## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-9, drawn to a method of determining the binding specificity of a ligand to a cell surface moiety.

Group II, claim(s) 10-22, drawn to a method of identifying a cell surface antigen specific to substantially only one of a plurality of cell types.

Group III, claim(s) 23-29, drawn to a method of determining the binding affinity of a compound for a cell surface antigen.

Group IV, claim(s) 30-37, drawn to a method of determining the binding specificity of a compound for an internalizing cell surface receptor.

The inventions listed as groups I-IV do not relate to a single general inventive Concept under PCT Rule 13.1 because, under PCT Rule 13.2 they lack the same or corresponding special technical features for the following reasons. Group I is a method of determining the binding specificity of a ligand to a cell surface moiety, whereas Group II is a method of identifying a cell surface antigen, Group III is a method of determining the binding affinity of a compound for a cell surface antigen and Group IV is a method of determining the binding specificity of a compound for an internalizing cell surface receptor. Group II requires providing a plurality of cell types with cell surface antigens

and candidate antibodies and the other groups do not require these limitations. Group III at least one antibody specific for an cell surface antigen of the test cell of the pair and Group IV does not require this limitation. Also Group III requires one or more test cell-antibody pairs and Groups I and II do not require this limitation. Further, Group IV requires at least one antibody effective to bind to an internalizing cell surface receptor and the other groups do not require this limitation. Thus, groups I-IV have different method steps and different outcomes. Therefore, there are 4 different methods. Under rule 13 Applicant is entitled to one product, one method of making and one method of using.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
